RAVONICS LLC

Federal Technology Contractor: AI, Autonomous Systems, Secure Computing

UEI: YCBDVKN1A9G7 **CAGE:** 20DS8
SAM.gov: Registered (Active) **HUBZone:** Certified (SBA)
Entity: Small Business (WV LLC) **Founded:** 2026

RELEVANT EXPERIENCE STATEMENT

Ravonics LLC was established in 2026 and has no corporate past performance or public financial disclosures of its own. This document presents the relevant experience Ravonics brings to federal engagements through two channels: the founder's personal career track record and the commercial maturity of affiliated partner-ecosystem products Ravonics bridges into federal markets. All career accomplishments below are attributed to Sean Hackney individually, across prior roles, and are not attributed to Ravonics as a company.

FOUNDER CAREER TRACK RECORD (SEAN HACKNEY, INDIVIDUALLY)

Sean Hackney

Founder | 30+ years computer science, 20+ years AI/ML

Sean Hackney's career spans enterprise AI strategy, agentic systems, zero-trust architecture, post-quantum readiness, DevSecOps, and cloud-native mission software. Company-reported: he holds an active U.S. Public Trust, which is not a security clearance, and dual cloud architecture certifications.

- **Company-reported certifications:** Microsoft Azure Solutions Architect Expert; AWS Certified Solutions Architect - Professional. Confirm current status independently.
- **Company-reported prior roles:** co-authored $36M+ in federal prime contract wins as key personnel (2025)
- **Company-reported prior role:** TechStars HR Tech AI application recognition
- Chairman, INSTAR Lab Inc (affiliated 501(c)(3) research partner for applied R&D and potential technology transition; no SBIR/STTR award eligibility is claimed)

Focus Domains:

Enterprise AI strategy and agentic systems; Zero-trust architecture and post-quantum readiness; Cloud-native mission software (Azure Government, AWS GovCloud); DevSecOps, secure software supply chain, continuous cATO evidence planning; multi-domain awareness

INSTAR LAB RESEARCH BENCH (AFFILIATED 501C3)

INSTAR Lab Inc is an affiliated 501(c)(3) research partner for applied physics and AI/ML R&D, chaired by Sean Hackney. Its physics research bench can support potential technology transition when an opportunity permits; no SBIR/STTR award eligibility is claimed.

Dr. Spoogmay Khan, INSTAR Lab Research Physicist

Ph.D. Physics & Astronomy, Ohio University; B.S. Physics (Gold Medalist), Abdul Wali Khan University

- Condensed-matter and materials science: thermal evaporation, sputtering, small-angle X-ray scattering
- High-energy particle-radiation effects on chalcogenide-based memory devices
- 6+ years university research and teaching; APS Student Ambassador
- Invited speaker, Materials Science & Technology conferences (2022-2024)

Suzanne Conejos, INSTAR Lab Applied Science Partner

M.S. Physics (statistics, computation & simulation), Ohio University; B.S. Physics

- Applied data science, AI-ML engineering, physics-informed simulation
- CMMC/SOC compliance and post-quantum cryptography readiness (NIST FIPS 203/204/205)
- AI Tech Lead; APS and ACM member
- Peer-reviewed physics conference publications

PARTNER ECOSYSTEM MATURITY

Ravonics serves as the federal go-to-market and compliance bridge for a portfolio of affiliated products. Partner capability descriptions are company-reported; Ravonics provides the federal contracting, compliance, and PII/ATO program management layer.

- **Dream Limited** - Capture/proposal automation and business-operations platforms
- **Droid Ops Inc, company-reported** - DevSecOps and compliance automation platform mapping 150+ NIST 800-53 controls, signed artifacts, and continuous cATO evidence; not a Ravonics certification
- **Viper Dynamics** - Real-time multi-domain situational awareness and intelligence fusion
- **INSTAR Lab Inc** - affiliated 501(c)(3) research partner with an applied physics bench; potential technology transition depends on the applicable opportunity
- **Cloud & Infrastructure** - Azure Solutions Architect Expert; AWS SA Professional; zero-trust and FedRAMP-aligned patterns

CORE TECHNICAL CAPABILITIES

AI/ML & Agentic Delivery
Agentic AI workflows with decision audit trails and lifecycle model governance.

Secure Software Supply Chain
Droid Ops platform, company-reported: 150+ NIST 800-53 control mappings, signed artifacts (SBOM, attestation), continuous cATO evidence generation, and policy-as-code; not a Ravonics certification.

Situational Awareness
Multi-domain sensor and data fusion for decision support; constrained-edge inference.

Zero-Trust Infrastructure
Immutable Kubernetes, zero-trust networking overlay, GitOps, encrypted secrets management.

Post-Quantum Readiness
PQC expertise aligned to NIST FIPS 203/204/205 (ML-KEM, ML-DSA, SLH-DSA). Migration strategy and cryptographic agility.

Inference & Edge AI
Federated GPU inference with OpenAI-compatible API. Mixture-of-Experts compression for bandwidth-constrained environments.

COMPLIANCE POSTURE

SAM.gov Registration	ACTIVE (VERIFIED)	HUBZone	CERTIFIED
NIST 800-171	ALIGNMENT UNDERWAY	CMMC Assessment	PLANNED
FedRAMP Architecture	ALIGNED (NO AUTH HELD)	Public Trust	REPORTED FOUNDER STATUS

Current SBA profile NAICS: 541512 Computer Systems Design (primary); 518210 Computing Infrastructure; 541330 Engineering; 541511 Custom Programming; 541513 Computer Facilities; 541519 Other Computer Services; 541690 Scientific/Technical Consulting; 611420 Computer Training
