

RAVONICS

RAVONICS LLC

Federal Technology Contractor: AI, Autonomous Systems, Secure Computing

UEI: YCBDEVKN1A9G7 CAGE: 20DS8

SAM.gov: Registered (Active) HUBZone: Certified

(SBA)

Entity: Small Business (WV LLC) Founded: 2026

RELEVANT EXPERIENCE STATEMENT

Ravonics LLC was established in 2026 and has no corporate past performance of its own. This document presents the relevant experience Ravonics brings to federal engagements through two channels: the founder's personal career track record and the commercial maturity of affiliated partner-ecosystem products Ravonics bridges into federal markets. All career accomplishments below are attributed to Sean Hackney individually, across prior roles, and are not attributed to Ravonics as a company.

FOUNDER CAREER TRACK RECORD (SEAN HACKNEY, INDIVIDUALLY)

Sean Hackney

Founder, President & Chief AI Officer | 30+ years computer science, 20+ years AI/ML

Sean Hackney's career spans enterprise AI strategy, agentic systems, zero-trust architecture, post-quantum readiness, DevSecOps, and cloud-native mission software. He holds an active U.S. Public Trust and dual cloud architecture certifications.

- **Certifications:** Microsoft Azure Solutions Architect Expert; AWS Certified Solutions Architect - Professional
- Co-authored \$36M+ in federal prime contract wins as key personnel (2025, prior roles)
- DoD CDAO Tradewinds "Awardable" status achieved for a mission-assurance AI platform (prior role)
- TechStars #1 AI application recognition (prior role)
- Gartner Magic Quadrant-recognized enterprise AI product leadership (prior role)
- Chairman, INSTAR Lab Inc (501(c)(3) R&D nonprofit, SBIR/STTR arm)

Focus Domains:

Enterprise AI strategy and agentic systems; Zero-trust architecture and post-quantum readiness; Cloud-native mission software (Azure Government, AWS GovCloud); DevSecOps, secure software supply chain, continuous cATO; JADC2 integration and multi-domain awareness

INSTAR LAB RESEARCH BENCH (AFFILIATED 501C3)

INSTAR Lab Inc is the dedicated R&D and SBIR/STTR research partner for the Ravonics ecosystem, chaired by Sean Hackney. Its physics research bench supports Ravonics engagements in quantum-readiness, materials science, and applied AI.

Dr. Spoogmay Khan, INSTAR Lab Research Physicist

Ph.D. Physics & Astronomy, Ohio University; B.S. Physics (Gold Medalist), Abdul Wali Khan University

- Condensed-matter and materials science: thermal evaporation, sputtering, small-angle X-ray scattering
- High-energy particle-radiation effects on chalcogenide-based memory devices
- 6+ years university research and teaching; APS Student Ambassador
- Invited speaker, Materials Science & Technology conferences (2022-2024)

Suzanne Conejos, INSTAR Lab Applied Science Partner

M.S. Physics (statistics, computation & simulation), Ohio University; B.S. Physics

- Applied data science, AI-ML engineering, physics-informed simulation
- CMMC/SOC compliance and post-quantum cryptography readiness (NIST FIPS 203/204/205)
- AI Tech Lead; APS and ACM member
- Peer-reviewed physics conference publications

PARTNER ECOSYSTEM MATURITY

Ravonics serves as the federal go-to-market and compliance bridge for a portfolio of commercially mature affiliated products. Partner capabilities are production-grade; Ravonics provides the federal contracting, CMMC/compliance, and PII/ATO program management layer.

- **Dream Limited** - Capture/proposal automation and business-operations platforms
- **Droid Ops Inc** - DevSecOps and compliance automation: 150+ NIST 800-53 controls, signed artifacts, continuous cATO evidence
- **Viper Dynamics** - Real-time multi-domain situational awareness and intelligence fusion
- **INSTAR Lab Inc** - 501(c)(3) R&D nonprofit. Applied physics bench. SBIR/STTR-ready
- **Cloud & Infrastructure** - Azure Solutions Architect Expert; AWS SA Professional; zero-trust and FedRAMP-aligned patterns

CORE TECHNICAL CAPABILITIES

AI/ML & Agentic Delivery

Autonomous pipeline from requirement through deployment. Hierarchical agent orchestration with full decision audit trails.

Secure Software Supply Chain

150+ NIST 800-53 controls. Signed artifacts (SBOM, attestation). Continuous cATO evidence generation. Policy-as-code.

Situational Awareness

Multi-domain 3D operational picture fusing AIS, ADS-B, satellite, weather, and hazard feeds. AI-driven object detection for ISR.

Zero-Trust Infrastructure

Immutable Kubernetes, zero-trust networking overlay, GitOps, encrypted secrets management.

Post-Quantum Readiness

PQC expertise aligned to NIST FIPS 203/204/205 (ML-KEM, ML-DSA, SLH-DSA). Migration strategy and cryptographic agility.

Inference & Edge AI

Federated GPU inference with OpenAI-compatible API. Mixture-of-Experts compression for bandwidth-constrained environments.

COMPLIANCE POSTURE

SAM.gov Registration	ACTIVE (VERIFIED)	HUBZone	CERTIFIED
NIST 800-171	ALIGNMENT UNDERWAY	CMMC Assessment	PLANNED
FedRAMP Architecture	ALIGNED (NO AUTH HELD)	Public Trust	HELD (FOUNDER)

NAICS Codes: 541512 Computer Systems Design; 541330 Engineering Services; 541715 R&D (Physical/Engineering); 518210 Computing Infrastructure; 541511 Custom Software Dev
